## California Regional Water Quality Control Board-Los Angeles Region Contracts and Grants Program

Project Summary: 03-228-554

Project Number: 03-228-554 Project Status: Cancelled/Withdr Grant Manager: M Flores

Project Name: Little Dalton Canyon Environmental Discovery Center and Equestrian

Facility

**Project on Schedule:** No

**Project Details** 

Watershed: San Gabriel River-Little Dalton Project Demonstrate the use of BMPs (e.g., bioswales and constructed

Description: wetlands) to reduce NPS pollution from equestrian and urban land uses in a subwatershed of the San Gabriel River, Walnut Creek, which has impaired water quality. Provide data and information for nutrient TMDL development and

information for nutrient TMDL development and implementation. Runoff from corralled animal facilities a major problem in Region. A pilot project for the subwatershed plan in development. Excellent stakeholder

support.

**Problem** Little Dalton Canyon Creek flows through the site and is **Statement:** part of the Walnut Creek sub-watershed. Substantial

part of the Walnut Creek sub-watershed. Substantial portions of the SG river are listed on the 1998 303(d) list due to ammonia, toxicity, excessive algea, elevated pH, trash, lead, and coliform bacteria. Horse corrals in the watershed contribute significant polluted runoff and are a

high priority for control.

Outcomes: Education/Outreach-BMP Implementation
